WORK EXPERIENCE

Software Engineer — PartAnalytics (acquired by Altium)

MAY 2023 – PRESENT

- Implemented **Azure SSO (OAuth 2.0, JWT)**, reducing login-related support tickets by **70%**.
- Built **RBAC** and token validation, and automated RFQ workflows using **Node.js cron jobs**.
- Designed LOA data archiving and restoration using **PostgreSQL partitioning and indexing**, reducing active DB size by **20%** and improving query performance..
- Designed and implemented a **supplier prioritization system** based on lead time, file uploads, and defined criteria, automating lowest-bidder selection using **Amazon SQS** for asynchronous processing.
- Identified and resolved data inconsistencies impacting **2K+** BOM datasets by writing **database migration scripts** and fixing implementations of **Arena** based job workflows.
- Developed **admin activity logging, audit trails**, and **granular access control** to ensure security compliance and traceability.
- Improved backend performance through **query optimization, Sequelize ORM tuning**, and **modular REST API design**.

Software Engineer Trainee — FunctionUp

Sep 2022 – Apr 2023

- Built a blogging platform with **authentication** and **CRUD APIs**. [GitHub](#)
- Developed a **URL shortener** using **Redis caching** for improved performance. [GitHub](#)
- Designed backend for a **shopping cart system** managing products, customers, and orders. [GitHub](#)

EDUCATION
